

Scarborough Advantage Variable Annuity

Quarterly Performance Report as of March 31, 2026

The performance data quoted represents past performance. Past performance is no guarantee of future results. The investment return and principal value of an investment in a variable annuity will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance quoted. Go to SecurityBenefit.com/Performance then choose the product name for the most recent month-end performance.

Neither Security Benefit Life Insurance Company nor Security Distributors is a fiduciary and the information provided is not intended to be investment advice. This information is general in nature and intended for use with the general public. For additional information, including any specific advice or recommendations, please visit with your financial professional.

You should carefully consider the investment objectives, risks, charges, and expenses of the investment options available under the variable annuities offered. You may obtain a prospectus and/or summary prospectus that contains this and other information about the investment options or variable annuity by calling our Service Center at 800.888.2461. You should read the prospectus and/or summary prospectus carefully before investing. Investing in variable annuities involves risk and there is no guarantee of investment results.

STANDARDIZED AND NON-STANDARDIZED - Both standardized and non-standardized performance reflect deduction of the mortality and expense risk charge and the annual administration and distribution charge. The Scarborough Advantage Variable Annuity does not have a sales load. Standardized returns are calculated from the later of October 27, 1999 (the date the contract was available for purchase) or the date the investment option was added to the contract. Non-standardized returns are hypothetical and are calculated from the inception date of the underlying investment option. Certain of the nonstandardized performance returns may pre-date the offering of the funds as an underlying investment option in the variable annuity.

Guarantees provided by annuities are subject to the financial strength of the issuing insurance company. Annuities are not FDIC or NCUA/NCUSIF insured; are not obligations or deposits of, and are not guaranteed or underwritten by any bank, savings and loan or credit union or its affiliates; are unrelated to and not a condition of the provision or term of any banking service or activity.

Triple-digit or high double-digit performance is attributable, in part, to unusually favorable market conditions and may not be repeated or consistently achieved in the future. Recent market volatility may affect performance so that current performance may be lower. Performance, especially for short time periods, should not be the sole factor in making your investment decisions.

The Scarborough Advantage Variable Annuity, Contract Form No. GV6059, is a flexible premium deferred variable annuity issued by Security Benefit Life Insurance Company (SBL) and distributed by **Security Distributors**, a subsidiary of SBL. SBL is wholly owned by SBL Holdings, Inc. ("Security Benefit").

Scarborough Alliance Group is a division of PlanMember Financial Corporation. Securities are offered through PlanMember Securities Corporation.

Goldman Sachs has voluntarily limited the fees and expenses of the Strategic Growth Series and the Small Cap Equity Insights Series. Absent such voluntary limit, performance figures would be lower for the Subaccount.

Morningstar Peer Group Rankings are based on total return performance and do not reflect the effect of sales charges. Funds are ranked within a universe of funds similar in investment objective.

Morningstar Rankings: For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar risk-adjusted return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receives four stars, the next 35% receives three stars, the next 22.5% receives two stars and the bottom 10% receives one star.

(Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) The overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five-, and ten-year (if applicable) Morningstar Rating metrics.

Neither SBL nor Security Distributors nor their affiliates/subsidiaries are related to Morningstar.

Annuities are long-term investments suitable for retirement investing.
