An investment in the Fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Guaranteed Group Annuity (also referred to as the Fixed Account Option) is a group unallocated fixed annuity contract issued by Security Benefit Life Insurance Company (“SBL”), contract form GV4586 (12-03)U. Waiver Type C - The difference between the gross expense ratio and the net expense ratio represents a contractual waiver of fees. A contractual waiver is generally provided for a specified period of time.

Waiver Type V - The difference between the gross expense ratio and the net expense ratio represents a voluntary waiver of fees. Unlike a contractual waiver, a voluntary waiver is not provided for a specified period of time and may end without notice. Refer to the fund's prospectus for details about this voluntary waiver.

The average annual total return figures assume a one-time investment of \$1,000 at the beginning of each period. All dividends are assumed to be reinvested. NAV performance returns do not reflect deduction of any front-end sales loads or contingent deferred sales loads that may be imposed by the funds. Such loads are waived by the funds for purchases made through this Program. If you purchase these funds outside of this Program, you may be subject to these charges. If the sales loads were reflected in the accompanying performance data, it would reduce the quoted performance. In addition, the NAV performance numbers do not reflect deduction of any Trust/Custodial Account charges, which would reduce the quoted performance. Because this performance information does not reflect deduction of Trust/Custodial Account charges, the quoted performance is higher than the performance experienced by your Trust/Custodial Account.

Triple-digit or high double-digit performance is attributable, in part, to unusually favorable market conditions and may not be repeated or consistently achieved in the future. Recent market volatility may affect performance so that current performance may be lower. Performance, especially for short time periods, should not be the sole factor in making your investment decisions.

The Security Benefit Advisor Retirement 401(k) Program and The Security Benefit Advisor Retirement 401(a) Program are Trust Accounts under §401 of the Internal Revenue Code. The Security Benefit Advisor Retirement Governmental 457 is a Trust Account under §457(g) of the Internal Revenue Code.

Security Distributors may use any of its corporate assets to pay such commissions and other distribution costs. Administrative, Marketing, and Support Service Payments

Security Distributors (and its affiliates) may receive payments from the underlying funds, their advisers, sub-advisers, and distributors, or affiliates thereof, in consideration for distribution, administrative, marketing, and other services Security Distributors (or its affiliates) provides. Security Distributors negotiates these payments, which may differ by underlying fund (sometimes substantially), and the amounts Security Distributors (or its affiliates) receive may be significant. Making these payments may provide an adviser, sub-adviser, or distributor (or affiliate thereof) with increased access to the Security Distributors and its affiliates. Security Distributors and its affiliates anticipate they will receive payments from the underlying funds, their advisers, sub-advisers, and distributors, or affiliates thereof in the form of 12b-1 fees, investor services fees and administrative payments that range in total from 0.00% to a maximum of 0.65% of the average net assets of the account invested in the underlying fund on an annual basis. This does not include the arrangements with certain of the investment advisers, sub-advisers, or distributors (or affiliates thereof) of certain of the Underlying Funds in which the payment is not based on the average net assets of the accounts invested in the underlying fund.

Morningstar Rating™ Often simply called the Star Rating, the Morningstar Rating brings performance (returns) and risk together into one evaluation (the Star Rating does not take into account sales loads). To determine a fund's star rating for a given time period (three, five, or ten years), the fund's risk-adjusted return is plotted on a bell curve: If the fund scores in the top 10% of its category, it receives 5 stars (Highest); if it falls in the next 22.5% it receives 4 stars (Above Average); a place in the middle 35% earns 3 stars (Average); those lower still, in the next 22.5%, receive 2 stars (Below Average); and the bottom 10% get only 1 star (Lowest). The Overall Morningstar Rating is a weighted average of the available three-, five-, and ten-year ratings.
