Rate Buy Up Feature	<p>Versions of the Index Accounts are available with and without the Rate Buy Up Feature. For a monthly charge, each Index Account using this feature in which the contract value is allocated, provides the owner the potential to receive higher index interest rate through a higher Cap, higher Participation Rate and/or lower Spread as applicable. At the end of the surrender charge period, if the total Buy Up Costs are greater than the total index interest credits (including non Buy Up Options), then the excess of the total Buy Up Costs over the total index interest credits will be refunded to the contract's Fixed Account. Please note: the refund of Buy Up Costs does not apply if an excess withdrawal is taken from the contract. Refer to the Rate Buy Up Feature Brochure for details.</p>
Pecking Order for Withdrawals	<p>Unless otherwise directed, withdrawals will be taken from accounts in the following order:</p> <ol style="list-style-type: none"> 1. Fixed Account 2. All 1-year Index Accounts 3. All 2-year Index Accounts <p><i>Within each level, the withdrawal is taken proportionally from each account.</i></p>
Reallocation/Transfers	<p>There are no restrictions on allocations.</p> <p>Reallocations or transfers into an Index Account may occur only on a Contract Anniversary (there is a 21 day window following an anniversary to do so). Transfers out of an Index Account may occur only at the end of an Index Term. The start of an Index Term corresponds to the Contract Anniversary.</p>
Fixed Account Guaranteed Minimum Interest Rate (GMIR)	<p>See the current Rate Sheet for the GMIR.</p> <p>The GMIR may vary by State and Issue Date.</p> <p><i>The GMIR is guaranteed for the life of the contract.</i></p>
Guaranteed Minimum Cash Surrender Value (GMCSV)	<p>The Guaranteed Minimum Cash Surrender Value is equal to the Fixed Account Minimum Cash Surrender Value plus the Index Accounts Minimum Cash Surrender Value; and minus Premium Tax if it applies. Refer to the SOU for more information on how the GMCSV is calculated.</p>
Nursing Home Confinement Waiver	<p>If an Owner is confined in a Hospital or Nursing Facility for 90 consecutive days, he or she may withdraw up to their full Account Value and waive all surrender charges, Bonus Recapture Charges and MVA (if applicable). The request for such waiver must be after the 3rd Contract Anniversary. Not available in CA and MA.</p> <p><i>May vary by State. A request for the waiver must be made on a SBL form and must be accompanied by a licensed doctor's statement.</i></p>

Terminal Illness Waiver	<p>If an Owner is diagnosed with a terminal illness after purchasing a contract, Surrender Charges, Bonus Recapture, and MVA (if applicable) will be waived. The request for such waiver must be after the 3rd contract Anniversary. Not available in CA and NJ.</p> <p><i>May vary by State. A request for the waiver must be made on a SBL form and must be accompanied by a licensed doctor's statement.</i></p>
Required Minimum Distributions (RMDs)	<p>RMD Friendly up to the amount SBL computes as required to be distributed under the Internal Revenue Code.</p> <p>During each contract year, if greater than the Free Withdrawal, owners may withdraw RMDs required for a single calendar year as the Free Withdrawal.</p> <p>Free Withdrawals are not subject to a Surrender Charge, Bonus Recapture (Strategic Growth Plus Annuity only), or MVA.</p> <p>Because RMDs are computed as of year-end and the contract year is based on the date the annuity is issued, two different amounts for the RMDs may apply for a contract year. The amount of the second RMD may be higher or lower than the first RMD amount and if lower, may cause the Free Withdrawal amount for a contract year to decrease.</p>
Death Benefit <i>All death benefits are calculated as of the date proof of death is received by SBL, which includes a certified death certificate and SBL's claim form completed in good order</i>	<ul style="list-style-type: none"> • Death benefit equals the greater of the Account value (with no Surrender Charge, Bonus Recapture, or MVA (if applicable), including any interim index credits) or the Guaranteed Minimum Cash Surrender Value on death of annuitant or the annuitant's spouse who is an owner. • The above death benefit is not paid out upon the original Owner's death if the contract is continued under its spousal continuation option. • On the death of an owner who is not an annuitant and not a spousal joint owner, we will pay out the greater of Cash Surrender Value (without interim year index credits) or the Guaranteed Minimum Cash Surrender Value. <p>In California, if the contract is issued to persons 60 or older, the amount payable is the greater of: (i) the Guaranteed Minimum Cash Surrender Value, or (ii) the Account Value, plus any applicable partial index credits, less a partial rider charge, regardless of who died.</p>

Guarantees provided by annuities are subject to the financial strength of the issuing insurance company. Annuities are not FDIC or NCUA/NCUSIF insured; are not obligations or deposits of, and are not guaranteed or underwritten by any bank, savings and loan or credit union or its affiliates; are unrelated to and not a condition of the provision or term of any banking service or activity.

Fixed index annuities are not stock market investments and do not directly participate in any equity, bond, other security, or commodities investments. Indices do not include dividends paid on the underlying stocks and therefore do not reflect the total return of the underlying stocks. Neither an index nor any fixed index annuity is comparable to a direct investment in the equity, bond, other security, or commodities markets.

Bonus annuities may include changes to the elements used to determine the index interest credits or changes to the interest rate that are not included in similar annuities without a bonus. These changes may include lower current interest rates, higher surrender charges, longer surrender charge periods, lower participation rates or caps, higher spreads, or other changes. The amount of charges or reduction of interest credits may exceed the amount of the bonus.

The Index includes a variable index deduction mechanism that scales upward based on positive performance of the Index. Such index deduction is applied when calculating the level of the Index and will thus reduce the return of the Index and any product linked to the Index. The Index applies a bespoke volatility control mechanism to identify changing market conditions using intraday data, and stabilize the overall level of risk of the Index. The volatility control calculation applied by Morgan Stanley as part of the Index's methodology may decrease the Index's performance and thus the return of any product linked to the Index. In addition, because the volatility control calculation is expected to reduce the overall volatility of the Index, it will also reduce the cost of hedging certain products linked to the Index.

Morgan Stanley may transact derivative transactions linked to the Index. Potential purchasers of products linked to this Index should refer to the full offering document for important information concerning such products, including the related risk factors and determine their own appraisal of the risks and suitability of such products.
