Rate Buy Up Feature	The Rate Buy Up Feature is available on each index crediting option. For a monthly charge, each Index Account using this feature in which the contract value is allocated, may provide the owner a higher interest credit rate through a higher cap, higher participation rate, and/or lower spread as applicable. At the end of the surrender charge period, if the total Buy Up Costs are greater than the total index interest credits (including non Buy Up Options), then the excess of the total Buy Up Costs over the total index interest credits will be refunded to the contract’s Fixed Account. Please note: the refund of Buy Up Charges does not apply if an excess withdrawal is taken from the contract (an excess withdrawal is a withdrawal that exceeds the annual free withdrawal limit). Refer to the Rate Buy Up Feature Brochure for details.								
Free Withdrawal	Beginning in the second contract year, 10% of the prior Contract Anniversary’s Account Value (for each subsequent year) is available without a Surrender Charge or with applicable Market Value Adjustment (MVA). Free Withdrawal amounts not taken in one contract year may not be carried over to a subsequent year.								
Guaranteed Minimum Interest Rate (GMIR)	The minimum interest rate that can be credited to the Fixed Account. The GMIR is set at contract issue for the duration of the contract.								
Nursing Home Waiver	If after the contract issue date the owner becomes confined in a hospital or Qualified Nursing Facility for 90 consecutive days, the Owner may withdraw up to the full Account Value without Surrender Charges and MVA. The request for such waiver must be after the 3rd Contract Anniversary. Not available in CA and MA. See the Statement of Understanding (SOU) for details.								
Terminal Illness Waiver	SBL will waive the Surrender Charge and MVA on full or partial withdrawals if the Owner is diagnosed with a terminal illness after the contract issue date. The request for such waiver must be made after the 3rd Contract Anniversary. Not available in CA and NJ. See the SOU for details.								
Death Benefit	If the Owner (or the Annuitant if the Owner is not a natural person) or a Joint Owner who is the spouse of the Annuitant dies, the death benefit is the greater of: (i) the Guaranteed Minimum Cash Surrender Value, or (ii) the Account Value, less any applicable premium tax. If a Joint Owner who is not the spouse of the Annuitant dies, the death benefit is equal to the Cash Surrender Value. In California, if the contract is issued to persons 60 or older, the amount payable is the greater of: (i) the Guaranteed Minimum Cash Surrender Value, or (ii) the Account Value, regardless of who died.								
Surrender Charge Schedule	Years	1	2	3	4	5	6	7	8+
	All states except CA	9.0%	8.1%	7.2%	6.3%	5.4%	4.5%	3.6%	0%
	CA	8.1%	7.2%	6.3%	5.4%	4.5%	3.6%	2.7%	0%
Market Value Adjustment (MVA)	During the Surrender Charge period, an MVA is applied to withdrawals in excess of the Free Withdrawal amount, full surrenders, or the death benefit paid on the death of a Joint Owner who is not the Annuitant’s spouse. The MVA does not apply to contracts issued in CA.

The Index includes a variable index deduction mechanism that scales upward based on positive performance of the Index. Such index deduction is applied when calculating the level of the Index and will thus reduce the return of the Index and any product linked to the Index. The Index applies a bespoke volatility control mechanism to identify changing market conditions using intraday data, and stabilize the overall level of risk of the Index. The volatility control calculation applied by Morgan Stanley as part of the Index's methodology may decrease the Index's performance and thus the return of any product linked to the Index. In addition, because the volatility control calculation is expected to reduce the overall volatility of the Index, it will also reduce the cost of hedging certain products linked to the Index.
